Flipping to Back Camera While Using Doxy.me
When you are connected with a patient, in a video session

This is your view of your patient.

The next slide will show you how you as the provider, or the patient can flip the screen by switching to the Back Camera using the bottom feature.
On the device, click on the System Settings button.
On the Camera option, click the down arrow and select Back Camera.
Wait a few moments while the connection is finalized.

After connection is finalized, the screen will reflect the back camera.
