While COVID-19 is changing the way we offer our programs and services, we would never allow it to prevent us from providing the care your patients and their families need during this uncertain time. We are currently offering Telehealth appointments via video and phone.

The Rehabilitation Technology Clinic at Children’s Specialized Hospital provides outpatient evaluations for the provision of adaptive equipment for patients 12 months to 21 years of age. Our physical therapists are experienced and trained in adaptive equipment and all are RESNA certified Assistive Technology Providers. Our outside suppliers are held to the highest standards. They are carefully screened, certified and provide timely and reliable service.

**Telehealth Evaluations Now Available for:**
- Special Needs Beds
- Supportive Strollers
- Activity Chairs
- Bath Equipment
- Special Needs Car Seats
- Simple Walkers

At this time, we can begin the process to assess for custom and power wheelchairs, but final recommendations will need to be completed in the clinic when we re-open.

For questions about Our Rehabilitation Technology Clinic or to make an appointment, please have families contact us at **(908) 389-5620**.

For questions about therapies or any other services, contact a Referral Development Representative at 732-258-7248 or acavallo@childrens-specialized.org

For referrals to therapies and all things Children’s Specialized Hospital, call 1-888-CHILDREN (244-5373) to schedule an appointment!
